h. On 2 June, most of the laborers were excavating at the field. A few workers stripped the debris of the former hangars on the southern edge of the field. It was observed that six temporary wooden buildings and two brick buildings on the southern edge of the field were bing used. About 500 meters northeast of these buildings, there were two new temporary buildings by a thick

Comment. Reconditioning work at the field was started in the fall of 1950 with a proportionally small number of laborers. For sketch of airfield boundaries, see Annex. According to this sketch, the landing field is being enlarged to the east and west. So far, no indications of the intended construction of a hard surface runway have been observed.
